

Confined Space Safety Training (User & Trainer)

Hamilton Blake, LLC

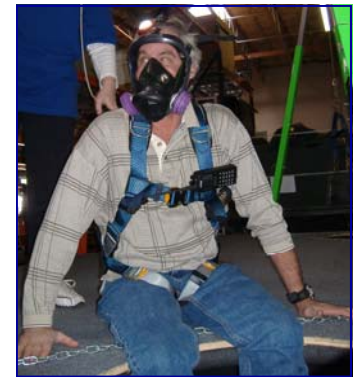

Las Vegas, Nevada

"We dedicate our knowledge to your safety"

Our Hamilton Blake Education and Safety Training Center offers a Confined Space Training class for workers in permit and non-permit confined spaces in industry and construction environments.

Experience practical rigging exercises in planning and executing successful Confined Space entry procedures, use of respirators and confined space equipment.

Much of the Confined Space Training includes hands-on work with systems such as respirators, monitors, retrieval winches and rescue gear. Attendees learn real-life scenarios.

G450 AutoCal Series
compact, economical, reliable

Call Us Today at 702-307-4477 to sign up your crew or supervisors. Check out www.hamiltonblakesafety.com for the current schedule

Learn how to use the new GfG Instrumentation Inc. 4 gas analyzer and work with the Sperian air gas monitors

Training is augmented by learning the proper use and calibration of gas detectors and analyzers from several manufacturers.

Las Vegas, Nevada or on-site for customers

Confined Space — Too Often The “Silent” Killer

You will participate in a group confined space scenario—entering a permit required confined space to locate a leak. The area will have one entrance exit. There are natural gas, water, electrical and chlorine pipes running through the confined space. What will you do to safely enter, perform the scope of work and exist properly? This is an excellent exercise for your learning experience.

No Boredom and No sleeping! We guarantee it! You will learn first-hand how to properly work in a confined space area after taking the Confined Space training Class—with full knowledge and qualifications to work in confined space areas.

Schedules: Confined Space Training is scheduled according to customer requirements—call us at 702-307-4477 for information.

You may also contact us day or night via our web site at www.hamiltonblakesafety.com
