

Fall Protection & Rescue Awareness Training

Hamilton Blake, LLC
"Fall Protection Solutions"
Las Vegas, Nevada

Hands-On Training in Components of Fall Arrest:

- Full Body Harnesses
- Connectors & Lanyards
- Anchorages
- Rescue Plan—policies & plans

Practical exercises for use of fall arrest system components such as self retracting lifelines, rescue devices, and specialty equipment for fall arrest and rescue

Spend a day learning OSHA/ANSI Fall Protection standards for Industry (1910) and Construction (1926) with compelling and motivating instructors

Eight Hour Hands-On and Rescue Awareness Class is limited to 15 attendees; providing an optimum learning experience with one-on-one instruction

Call or email us today to sign up you and your crew for a great training day with us!

Our 2-story hands-on training center is perfect for one-on-one training with safety equipment used in the field. The center offers horizontal lifeline systems, catwalks, vertical climbing systems with ladders, and leading edges—all material and equipment needed for a student to experience real-world scenarios

The Benefits Of Our Training For Supervisors and Workers at Height Las Vegas, Nevada or At Your Job Site

Training Guaranteed to Motivate Your Employees to Work Safe!

Our presentation is an Interactive, Motivating force for your employees...designed for individual participation at all levels of workers—from staff members to management

Want to get your people behind their fall protection plan? ...put them in a hands-on class where they will be involved and active throughout training

No sleeping! Your crew will learn first-hand how to select the correct gear, what it feels like to suspend in their harness, techniques for self-rescue, and how to use specialty equipment

Each student is taught how to properly inspect fall protection gear and document the condition

On-site, customized training classes are available—simply call us **today at 702-307-4477** for a quote.

What our clients have to say...

"Excellent course, good information, very timely, and applicable to our use here at Hoover Dam," **Terry Warner, Director of Engineering, Bureau of Reclamation Hoover Dam**

"Great information...our entire crew benefited from the training." **Dave Hughes, Safety Superintendent, Granite Construction**

"...Best training I've received thus far in this industry...your training course opened my eyes to the reality of what this line of work entails if I am going to do it right, irrespective of what others do." **...Barry Durmaz, Owner—Strategic Cleaning & Access**
